Claim 1. (Currently Amended) A veterinary composition comprising at least one keratolytic and cerumenolytic cleaning agent, wherein said keratolytic and cerumenolytic cleaning agent is lactic acid, salicylic acid or a mixture thereof; at least one bactericide agent, wherein said bactericide agent is a Cetraria islandica extract; at least one yeast control agent wherein said yeast control agent is lactic acid, salicylic acid or a mixture thereof; and at least one anti-irritant and anti-pruriginous agent, wherein said anti-irritant and anti-pruriginous agent is a *Cucumis sativus* vegetable extract.

Claim 2. (Previously Presented) The composition according to Claim 1, further comprising at least one agent that heightens cerumenolytic properties of said composition.

Claim 3. (Currently Amended) The composition according to Claim 1, further comprising at least one vegetable extract with antiseptic and cicatrizant properties, wherein said vegetable extract is a Mimosa tenuiflora extract, Cetraria islandica extract, Camomilla recutita extract or a mixture thereof.

Claim 4. (Currently Amended) The composition according to Claim 1, further comprising at least one deodorant, wherein said deodorant is a Cetraria islandica extract.

Claims 5-8. (Cancelled).

Claim 9. (Previously Presented) The composition according to Claim 2, wherein said agent that heightens the cerumenolytic properties of said composition is oleic acid.
